Assignment 3 - The IPSA Case

Structure of the Assignment

1. Analysis of the problem: symptoms and causes.
2. Operational Goals of your team.
3. Operative and concrete measures to be implemented regarding:
 - a. The Elephant.
 - b. The Rider (for employees)
 - c. The environment.

You can ask questions about the exercise at any time via email, and as long as you don't ask me to solve the decision for you, I will answer them. You should definitely ask many questions, as there is critical information that is not in the document you have about this case. I will say it again: there is critical information missing in the document, and part of solving effectively the assignment is identifying missing information and asking for it.
